

### ***Advance to Funding Program – Letter of Intent Information***

The Mountain West CTR-IN offers researchers with faculty appointments at our partner institutions the opportunity to have an NIH Study Section-like external review of their R-type grant proposals for clinical or translational research by content experts with Study Section experience prior to submission to the NIH or other similar sponsors.

These reviews provide insight into the scientific review process. They are offered to help applicants improve the persuasiveness, scientific content and format of their proposals to make them more competitive prior to submission to the funding agency.

PI name:

Institution: Select one from the drop-down box

Title of project: Limited to 81 characters including punctuation and spacing

Proposed NIH Institute (s)

Type of Award (R01, R21, R15 etc.)

Whether this is a New application or a Re-submission
