

ADVANCING HEALTH DISPARITIES IN THE MOUNTAIN WEST REGION

UNLV STUDENT UNION, 2nd FLOOR June 10 – 11, 2019 Las Vegas, NV

Our Mission

Build and Enhance Infrastructure Capacity to Increase Clinical & Translational Research in the Mountain West Region

To accelerate the development of research capacity

To increase the quantity and quality of successful NIH and other grant applications in clinical and translational research

To accelerate scientific discovery to improve the health of the residents of the 7 Mountain West IDEA State Region

Message from the Principal Investigator

Dear MW CTR-IN Annual Meeting Attendees,

I am thrilled to welcome you to our 6th Annual Mountain West (MW) Clinical & Translational Research Infrastructure Network (CTR-IN) Programmatic Meeting. I would like to extend a very warm welcome to all of the Mountain West research leadership, investigators, staff, collaborators, and colleagues as we celebrate our renewed Grant.

Our Annual Meeting this year addresses several programmatic priorities including the Opioid Crisis. As part of this focus on the Opioid Crisis, we will present some of our own MW CTR-IN Program funded research to combat the Opioid Crisis in the Mountain West Region. In addition, our Annual Meeting further builds upon the momentum generated in our previous meetings by facilitating a collaborative atmosphere to foster and enhance clinical and translational research.

Hence, in order to further foster and enhance clinical and translational research, a number of sessions such as the MW IDeA Program PI's Collaborative Workshop and Prior Years Pilot Grant Awardees (with extramural grant funding) meeting have been planned. Over the years, the MW CTR-IN Program has stimulated clinical research from many diverse disciplines including Engineering, which traditionally does not engage in clinical and translational human research. As such, we are featuring some of our past accomplished Engineering Pilot Grant Awardees who have exceled in clinical and translational research. We are also showcasing oral and poster research presentations involving clinical and translational research being conducted at our 13 Mountain West partner Universities. Moreover, we have also invited our past Pilot Grant Awardees with extramural grant funding to further learn from their successes and to optimize their continued involvement with the MW CTR-IN Program. We are also featuring some of our research leadership from the Mountain West Region relating to the impact of the MW CTR-IN Program on our partner Universities.

As last year, a Welcome and Networking Reception with a formal dinner to celebrate the past, present, and future of the MW CTR-IN Program at the Smith Center of the Performing Arts will be held on June 10th, Monday evening. This Reception will also include a poster viewing session featuring our current Pilot Grant Awardees as well as clinical and translational research being conducted throughout the MW Region.

I hope you will enjoy our 6th Annual MW CTR-IN Meeting as you further develop collaborations to enhance clinical & translational research in the Mountain West Region to improve the health of our residents.
